

**Noko Sekwati, Acting Geologist:
ARM**

He hails from the dusty streets of Mhlaletse, Ga Sekhukhune in Limpopo Province. He holds a BSc Honours in Geology and later completed an MSc in Geology at Stellenbosch University in 2024 under the African Rainbow Minerals (ARM) GeoMetallurgy Research Chair.

His master's research, titled "The Geological Characterisation of the Makganyane Exploration Project," was conducted within ARM Northern Cape Operations, contributing to the understanding

of the geological potential of the project area.

Noko began his professional career at Barberton Gold Mines and has since been appointed as a Geology Graduate at ARM Bokoni Platinum Mine in Atok, Limpopo. As part of his professional development, he is responsible for a shaft, gaining critical operational and technical exposure.

He is a registered Certified Scientist with the South African Council for Natural Scientific Professions (SACNASP).
