

Victor Thobakgale Technology Operations Lead – ARM

Victor Thobakgale is a technology operations leader and cloud/enterprise infrastructure strategist with 18+ years of experience driving digital transformation, operational resilience, and measurable business value. He leads enterprise IT and Operational Technology (OT) operations, helping organizations modernize platforms, strengthen cybersecurity, and improve cost transparency through cloud technology, automation, and governance.

His expertise spans cloud platforms, network modernization, Zero Trust security, and data/analytics enablement. Victor has worked across mining, telecommunications, logistics, and financial services, partnering with executive teams to align technology roadmaps to business outcomes, risk posture, and ESG priorities.

Victor holds a BTech and Master of Technology in Information Technology earned from the University of Johannesburg and recently completed the Executive Development Program at Wits Business School.
